Many kids get hungry between meals. A healthy snack can provide your kids with energy and help them get the nutrients they need on a daily basis.

**Healthy snack options:**

**Fruit:** A piece of fruit is a convenient and healthy snack for kids. Most fruits contain fibre and important nutrients like potassium and vitamins A and C - Bananas, apples, pears, grapes, peaches, and plums are examples of fruits that can be used for grab-and-go snacks.

**Fruit smoothies:** A fruit smoothie is a good way to pack a lot of nutrients into a small snack.

**Yogurt:** Yogurt is an excellent snack for children and young people because it’s a good source of protein and calcium. Calcium is especially important for developing bones. Try to avoid yogurts with high sugar content.

**Cheese:** Cheese provides children with high-quality protein, which is needed for proper growth. Protein will also help them feel full between meals.

**Boiled eggs:** Eggs are highly nutritious and an excellent snack for kids. They provide high-quality protein and several vitamins and minerals, including vitamin B12.
